Md Sajid **Ahmed**

AI Engineer · Researcher

1608 University Court, Apt D103 Lexington, Kentucky 40503, USA

(+1) 859-913-6028 | sajid.ahmed1@northsouth.edu | sajidahmed12.github.io | sajidahmed12 | sajid-ahmed-rafi | Google Scholar |

Deep Learning | Computer Vision | NLP

Education

BSc in CSE - North South University

Dhaka, Bangladesh

Specialization: Computer Vision, Biomedical Signal Processing *Jan. 2016 – Aug. 2019*

- Relevant Coursework: Pattern Recognition, NLP, Computer Architecture, Data Mining

Work Experience

AI Engineer - Altersene Limited

Dhaka, Bangladesh

Led Computer Vision-based HAR model development for the Garment Industry *Oct. 2022 - July 2024*

- Proposed and designed an overall service architecture for industrial process automation systems in the RMG sector.
- Developed multiple machine learning models for RMG worker's activity monitoring and improved the average precision accuracy by 30 %.
- Developed a continuous CI/CD ML model validation pipeline to ensure the trained model's reliability and scalability in production.
- Built and tested semi-automated ML pipelines on distributed servers for containerized applications using Docker and Kubernetes

Lab Instructor - North South University

Dhaka, Bangladesh

Undergraduate Lab Course Instructor at the Dept. of CSE *Sep. 2019 - Dec. 2022*

- Prepared and delivered lab manuals for each course to conduct lab assessments in every class
- Delivered lectures on topics to grasp the knowledge of lab sessions better
- Courses Taught - Database Systems Lab, Computer Architecture Lab, Digital Logic Design Lab, Object Oriented Programming Lab

Research Assistant Intern - TnR Lab

Dhaka, Bangladesh

BioMedical Research Group, North South University with Prof. Tanzilur Rahman *Nov. 2019 - Dec 2020*

- Proposed a Smartphone video-based Blood Glucose level prediction model with PPG signal processing and Biomedical Feature Engineering.
- Developed a PPG signal-based Feature Engineering algorithm to generate relevant features for the blood glucose level prediction model.
- Built a machine learning model to predict blood glucose level from human fingertip video collected from a regular smartphone camera (Paper accepted in MDPI Applied Sciences'21)

Volunteer Research Experiences

Fellow Researcher at The Fatima Fellowship, Sponsored by HuggingFace

Massachusetts, USA (Remote)

Led a project on Emerging Number Systems in ML Systems with Dr. Abdulrahman Mahmoud *June. 2022 - August 2023*

- Proposed a new application towards emerging number formats in DNN Accelerators
- Improved performance on object detection-based networks ML runtime performance over fault injections

Student Researcher - ECE Department

Dhaka, Bangladesh

ECE Department, North South University with Prof. Mohammad Ashrafuzzaman Khan *Aug. 2018 - April 2019*

- Proposed a FCN-based Road Segmentation Model with real-time web interface and mobile application
- Improved performance over model's accuracy with a fine-tuned ResNet50 backbone pre-trained on ImageNet
- Modified pre-trained VGG16 model and used transpose convolution to upsample the images like an encoder-decoder architecture.

Teaching

Undergraduate Teaching Assistant (UGA) — *Dhaka, Bangladesh*

Department of ECE, North South University — *Feb. 2019 - Aug. 2019*

- Assisting faculty members in the Digital Logic Design and Computer Architecture Course.
- Conducting tutorial sessions for students.
- Performing invigilation in exam halls.
- Evaluating home-works, assignments, and projects.

Tutorial Instructor — *Dhaka, Bangladesh*

ACM R&D Group, NSU — *Jun. 2018 - Dec. 2018*

- Conducted weekly tutorial and lecture sessions for R&D group members and assisted students and members in their projects and presentations.

Skills

Programming	Python, C/C++, Java, Bash-Script, Github, LaTeX, Markdown
Framework	PyTorch, Huggingface, OpenCV, NumPy, Pandas, SciPy, PIL, Matplotlib, Seaborn, Scikit-learn, Streamlet, NLTK
Web	**Backend:** FastAPI, REST Framework, **Databases:** Redis Stream, MySQL, MongoDB, **Scraping:** Beautiful-Soap, Selenium, **Broker**: ZMQ, Kafka
Utilities	Git, Docker, FFMPEG, Redis-Insight, Label-Studio, MS Office, Draw.io
Languages	English, Benglai, Hindi

Selected Projects

Real-Time Road Crack Detection and Feedback System Using Instance Segmentation [GitHub] — *Dhaka, Bangladesh*

Bachelor's Thesis/Capstone Project — *Summer 2019*

- Proposed an application and Real-time feedback-based model on image segmentation to detect road cracks and anomalies.
- Used YOLACT to label the pixels of a road in images.

ConvoCraft-AI-Powered-Dialogue-Generator-with-GPT-2-Language-Model [GitHub] — *Dhaka, Bangladesh*

CSE495 - NLP Term Project — *Summer 2019*

- Proposed a neural network to generate dialogues related to the characters in the Game of Thrones series.
- Used GPT-2 to generate relevant texts and used pre-generated texts to generate dialogues.

FoodAI: Real-Time Food Detection with Faster-RCNN Model.[GitHub] — *Dhaka, Bangladesh*

Pattern Recognition Course Project — *Spring 2019*

- Proposed an object detection model to detect a total of four different types of Bangladeshi Foods.
- Used TensorFlow object detection API for detection.

Sensor Data-based Human Activity Recognition with various Feature Engineering Techniques [GitHub] — *Dhaka, Bangladesh*

Data Mining Course Project — *Fall 2018*

- Proposed a model to classify human activities and achieved nearly perfect accuracy (96.5 %).
- Used UCI Repository HAR time series data to classify human activities & with feature engineering.

Honors & Awards

Academic

2019 **Champion**, NSU ACM SC Capstone Innovation Challenge Season 8
2018 **2nd Runner up**, IEEDAY PES 2018 Project Showcase Competition, IEEE PES
2017 **50 % Scholarship on Tuition Fees**, Recognition of Excellent Academic Performances
